

WATER

Dr. Sushil Kumar Mishra

Associate Professor & Former Head, Department of English, SRM University, Sonepat, (Haryana) India

Water! Water! Water is life

No water no life.

Regular intake of water generates life

Irregular intake of water degenerates life.

Essential for human beings

As well as for all beings.

Water is life

And strength and breath

And the want

Of water is death.

A great boon of nature

With a lot of features.

Provides effective lubrication

And causes detoxification.

Each and every human cell needs water

To run its function faster.

Indispensable resource for the economy

And a great boost to the economy.

Maker of life

And protector of life
